Professional summary

Dedicated and safety-focused hospital housekeeper with experience in operating room sanitation and sterile processing support. Skilled in adhering to infection control standards, preparing surgical suites, and collaborating with clinical staff under time-sensitive conditions.

Experience

June 2020 - Now

Operating Room Housekeeper

Northwestern Memorial Hospital / Chicago, IL

- Perform terminal cleaning and turnover prep for 14+ surgical suites daily, ensuring all high-touch surfaces, floors, and equipment areas meet strict CDC and AORN standards.
- Assist surgical staff with rapid room turnovers between procedures by coordinating timing and ensuring anesthesia and sterile fields are reset without delay.
- Safely dispose of sharps, linens, and biological waste in compliance with OSHA and hospital safety procedures, reducing contamination risks.
- Monitor and restock surgical suite supplies like sanitizer, PPE, and cleaning agents, ensuring uninterrupted service during peak surgery schedules.

2016 - 2020

Environmental Services Tech

Rush University Medical Center / Chicago, IL

- Completed routine and terminal cleaning in surgical prep, PACU, and procedural zones while adapting to high patient flow and emergencies.
- Maintained strict records of disinfection rounds and contributed to a department-wide 97% audit compliance during monthly infection control checks.
- Operated electrostatic sprayers and UV-C disinfection tools post-COVID, following revised protocols and staff training sessions.

Additional Information

Completed a 3-week intensive training on OR suite prep and post-op decontamination procedures as part of hospital onboarding.
