- Cloud: AWS, Google Cloud Platform
- Databases: MySQL, PostgreSQL, MongoDB
- Agile/Scrum Development

AIDEN HARPER

SENIOR JAVA BACKEND DEVELOPER

PROFESSIONAL SUMMARY

Experienced Senior Java Backend Developer with 7+ years of expertise in building scalable, high-performance applications. Proven track record in leading backend development teams and delivering API-first solutions in industries such as e-commerce and financial technology. Expertise in Spring Boot, microservices, and cloud-based architectures.

EXPERIENCE

- January 2021 - Now

Senior Java Backend Developer

Stripe / San Francisco, CA

- Lead the design and development of backend systems supporting payment processing at scale.
- Architected microservices-based solutions using Java Spring Boot and Docker, ensuring 99.9% system availability.
- Collaborated with cross-functional teams to improve payment gateway systems, reducing transaction processing time by 15%.
- Implemented advanced security protocols to enhance the protection of financial data.

- August 2017 - December 2020

Java Backend Developer

Square / San Francisco, CA

- Developed RESTful APIs for point-of-sale applications, supporting over 2 million merchants worldwide.
- Integrated third-party services and data pipelines to optimize payment systems.
- Worked on optimizing database performance, reducing query execution time by 30% using MySQL and PostgreSQL.
- Mentored junior developers and conducted code reviews to improve the development process.
