- Expertise in creating and executing preventive maintenance schedules to improve equipment performance and longevity.

EMILY TURNER

AGRICULTURAL DIESEL MECHANIC

PROFESSIONAL SUMMARY

Dedicated Diesel Mechanic with 7 years of experience specializing in the maintenance, repair, and troubleshooting of diesel-powered agricultural machinery. Proficient in servicing tractors, combines, irrigation engines, and other farming equipment. Expertise in hydraulic systems, power take-offs (PTO), and fuel systems. Passionate about supporting the agricultural industry by enhancing machinery uptime and operational efficiency.

EXPERIENCE

- August 2019 - Now

Diesel Mechanic

Central Valley Farming Equipment / United States, Fresno, CA

- Troubleshoot and repair hydraulic systems, power take-offs (PTO), fuel systems, and transmission issues to minimize downtime and maximize productivity in the field.
- Conduct on-site repairs for farmers, offering quick solutions to ensure that operations continue smoothly during critical planting and harvesting periods.
- Collaborate with farmers and equipment operators to assess equipment performance and provide proactive maintenance recommendations.
- Maintain accurate records of services, repairs, and parts used for inventory management, billing purposes, and warranty compliance.
- Train and mentor junior mechanics and apprentices on agricultural machinery repairs and safety practices.

- June 2018 - July 2019

Mechanic Assistant

Turner Family Farms / United States, Fresno, CA

- Assisted with routine maintenance, oil changes, and minor repairs on farming equipment, including tractors and plows, ensuring proper functionality throughout planting and harvest cycles.
- Gained hands-on experience in diagnosing and troubleshooting engine and transmission issues on a variety of agricultural vehicles and equipment.
- Assisted senior mechanics with more complex repairs, including engine overhauls, fuel system repairs, and hydraulic system diagnostics.
- Conducted seasonal equipment checks to ensure readiness for planting and harvesting, minimizing delays caused by mechanical issues.
