 alberto.baudoïn@gmail.com

 Detroit Lakes, MN

EDUCATION

Bachelor of Science in Computer Science

University of Minnesota - Morris, United States

2008 - 2012

Certified Malware Reverse Engineer (CMRE)

September 2020

GIAC Reverse Engineering Malware (GREM)

March 2019

SKILLS

- Malware analysis and reverse engineering (IDA Pro, Ghidra, OllyDbg)
- Threat intelligence and incident response
- Advanced programming (Python, C++, Assembly)
- Static and dynamic malware analysis
- SIEM platforms (Splunk, ArcSight)
- Network traffic analysis and packet inspection (Wireshark, tcpdump)
- Exploit development and mitigation strategies
- Strong understanding of ransomware, Trojans, worms, and zero-day attacks

ALBERTO BAUDOIN

SENIOR MALWARE ANALYST

PROFESSIONAL SUMMARY

Dedicated and highly analytical Malware Information Security Analyst with experience in identifying, analyzing, and mitigating malware threats. Proficient in reverse engineering, threat intelligence, and incident response to ensure organizational cybersecurity. Seeking to contribute advanced malware analysis skills to safeguard critical systems and data.

EXPERIENCE

- June 2018 - Now

Senior Malware Analyst

CyberDefenders Inc. / United States, Minneapolis, MN

- Conduct in-depth malware analysis using dynamic and static analysis techniques to identify threat vectors and create countermeasures.
- Reverse-engineer malicious code to understand behavior and impact, generating detailed technical reports for stakeholders.
- Collaborate with threat intelligence teams to identify patterns in cyberattacks and enhance detection mechanisms.
- Develop custom scripts and tools in Python and C++ to automate malware analysis and improve efficiency.

- March 2015 - May 2018

Malware Information Security Analyst

TechSecure Solutions / United States, Fargo, ND

- Analyzed malware samples and documented their capabilities, persistence mechanisms, and command-and-control protocols.
- Supported incident response teams by providing detailed malware profiles and mitigation recommendations.
- Implemented SIEM rules and IDS signatures to detect and respond to emerging malware threats.

- January 2013 - February 2015

Information Security Analyst

Global CyberTech / United States, St. Paul, MN

- Monitored and responded to cybersecurity alerts, focusing on malware detection and containment.
- Conducted penetration tests and vulnerability assessments to strengthen system defenses.
