

CNC Machinist

John Miller

Professional summary

Detail-oriented and highly motivated CNC machinist with hands-on experience working with CNC machines and tools. Skilled in blueprint reading, machine setup, and operating CNC mills and lathes. Eager to contribute technical skills to an innovative manufacturing team.

Experience

Junior CNC Machinist

July 2024 - Now

Precision Manufacturing Co. / United States, Houston, TX

- Operate CNC milling and turning machines to fabricate precision parts according to blueprints and technical drawings.
- Perform routine maintenance on machines to ensure operational efficiency and longevity.
- Inspect finished products for accuracy using precision measuring instruments like micrometers, calipers, and height gauges.
- Assist senior machinists in troubleshooting and resolving issues with CNC machines.
- Follow safety protocols and maintain a clean and organized work environment.

CNC Machinist Intern

June 2023 - June 2024

Advanced Components Corp. / United States, Houston, TX

- Assisted in the setup and operation of CNC equipment, ensuring machine accuracy and safety.
- Learned to read and interpret technical drawings and blueprints.
- Performed basic machine maintenance and contributed to a streamlined production process.
- Worked with a team to optimize machine settings for increased efficiency and quality.

Education

Certificate in CNC Machining

Houston Community College

Graduated: May 2024

Associate Degree in Manufacturing Technology

University of Houston

Graduated: May 2023

CNC Programming and Operations Certification

National Institute for Metalworking Skills

Certification Date: June 2023

Forklift Safety Certification

OSHA

Certification Date: April 2023
