Pediatric Ophthalmic Technician

PROFESSIONAL SUMMARY

Patient-centered ophthalmic technician specializing in pediatric care. Skilled in creating a supportive environment for young patients during eye exams and treatments. Proven ability to handle complex pediatric cases, support ophthalmologists in surgeries, and educate families on vision care.

EXPERIENCE

Pediatric Ophthalmic Technician, Seattle Children's Hospital, United States

May 2018 - Now

- Conduct child-friendly diagnostic tests such as refractions, cycloplegia exams, and visual field testing.
- Educate parents and caregivers on amblyopia management, eye patching protocols, and post-treatment care.
- Maintain patient records in the EMR system and ensure accurate documentation for follow-up visits and treatment plans.
- Collaborate with multidisciplinary teams to develop comprehensive treatment plans for children with vision impairments.

Ophthalmic Assistant, Puget Sound Eye Specialists, United States, Everett, WA

January 2014 - May 2018

- Performed routine eye exams for pediatric and adult patients, including visual acuity testing, tonometry, and pupil dilation.
- Managed pediatric patients' eye care needs, providing education on childhood vision disorders and treatments.
- Ensured the cleanliness and sterilization of equipment in compliance with health and safety regulations.
