

Junior Cloud Engineer (DevOps)

Michael Johnson

Professional summary

Driven and proactive Junior Cloud Engineer with a focus on DevOps practices. Experienced in automating infrastructure, continuous integration, and delivery pipelines. Adept at working in collaborative environments to streamline development processes, optimize cloud resource usage, and ensure scalable application deployments

Experience

Junior Cloud Engineer (DevOps)

May 2025 - Now

CloudX Technologies / San Francisco, CA

- Develop and maintain Docker containers for cloud-based applications, enhancing the deployment process.
- Manage the deployment and orchestration of containerized applications on Kubernetes clusters.
- Participate in performance monitoring using AWS CloudWatch, Azure Monitor, and New Relic.
- Support troubleshooting and incident resolution during deployment failures and application performance degradation.

DevOps Intern

June 2024 - May 2025

Innovative Solutions Corp. / San Francisco, CA

- Assisted in setting up and maintaining Jenkins pipelines for continuous integration and deployment.
- Supported infrastructure automation using Terraform and Ansible, optimizing resource provisioning.
- Worked closely with developers to enhance Docker configurations and streamline container orchestration with Kubernetes.

Volunteering

Cloud Computing Mentor

October 2024 - Now

Code for Good – Tech Mentorship Program, San Francisco, CA

- Provide mentorship and guidance to aspiring cloud engineers and developers, helping them understand cloud concepts and best practices.
- Conduct hands-on workshops on cloud technologies like AWS, Docker, and Kubernetes for students in the program.
- Collaborate with industry professionals to organize cloud engineering webinars and hackathons.

San Francisco, CA

Education

Bachelor of Science in Software Engineering

University of California

Graduated: May 2025

- Relevant Coursework:** Cloud Computing, Data Structures, DevOps Practices
- Academic Achievements:** Dean's List, 2022–2023, Capstone Project on Cloud-Based Microservices Architecture

Certifications

- Certified Kubernetes Administrator (CKA)**, The Linux Foundation, August 2023
- Docker Certified Associate**, July 2023

Skills

Cloud Platforms: AWS, Azure 

Automation Tools: Terraform, Ansible 

CI/CD: Jenkins, CircleCI, GitLab 

Containerization: Docker, Kubernetes 

Cloud Monitoring: AWS CloudWatch, Azure Monitor, New Relic 

Scripting: Python, Shell, Bash 

Version Control: Git, GitHub, GitLab
