

EVELYN DUGGAN

CNC Manufacturing Technician

(555) 555-5555 

evelyn.duggan@email.com 

Chicago, IL 

PROFESSIONAL SUMMARY

Skilled CNC Manufacturing Technician with experience in operating and maintaining CNC machines, performing routine maintenance, and ensuring high-quality production standards. Adept at interpreting blueprints, troubleshooting, and optimizing machine performance. Proven track record in reducing waste and improving efficiency within a fast-paced environment.

SKILLS

- CNC Milling & Turning **Expert**
- Machine Setup & Calibration **Expert**
- Blueprint Interpretation **Expert**
- Quality Control & Inspections **Expert**
- Preventative Maintenance **Expert**
- Problem-Solving **Expert**
- Process Optimization **Expert**
- Safety Compliance **Expert**
- Software: Mastercam, AutoCAD **Expert**
- CNC Machines: Haas VF-2, Okuma LB3000 **Expert**
- Other Tools: Dial Indicators, Vernier Calipers, Micrometers **Expert**

EDUCATION

Associate of Applied Science in Manufacturing Technology

University of Illinois – Urbana-Champaign, IL

Graduated: May 2014

Certified CNC Operator (NIMS)

National Institute for Metalworking Skills

Certified: June 2018

EXPERIENCE

2019 - Now

CNC Technician

Smith & Wesson Manufacturing / Chicago, IL

- Operate CNC milling machines, producing precise components for firearm assembly, meeting high tolerance requirements.
- Conduct regular maintenance and calibration of CNC machines to ensure optimal performance, resulting in a 10% reduction in machine downtime.
- Interpret blueprints, technical drawings, and machine specifications to ensure parts were within required tolerances.
- Collaborate with quality assurance teams to perform quality control checks, ensuring each product met strict company and industry standards.

2015 - 2019

CNC Operator

General Electric Appliances / Louisville, KY

- Managed CNC lathe and mill operations to manufacture components for industrial refrigeration units.
- Worked with engineers to improve machining processes, reducing cycle times by 12% without sacrificing part quality.
- Performed preventive maintenance and troubleshooting to minimize machine breakdowns and reduce repair costs.
- Maintained a clean and organized workspace, adhering to all safety standards and reducing accidents by 15%.
