PROFESSIONAL SUMMARY

Full-stack software engineer with experience developing scalable web applications and leading Agile teams. Adept at designing secure APIs, improving code performance, and collaborating cross-functionally to deliver enterprise-grade solutions.

EDUCATION

Bachelor of Science in Computer Science

University of Washington | Seattle, WA | 2018

Certified Kubernetes Application Developer (CKAD)

Issued Jan 2024

AWS Certified Solutions Architect – Associate

Issued Aug 2023

SKILLS

- JavaScript, TypeScript, React, Node.js, Python — Expert
- PostgreSQL, MongoDB, Redis — Expert
- Docker, Kubernetes, AWS, Jenkins — Expert
- RESTful API design, GraphQL — Expert
- CI/CD pipelines, Git, Agile/Scrum methodologies — Expert
- Code reviews, unit testing, performance tuning — Expert
- Problem-solving, task prioritization, remote team communication — Expert

EXPERIENCE

2021 - Now

Senior Software Engineer
Zillow Group / Seattle, WA

- Lead the migration of the flagship property search platform from Angular to React, resulting in a 30% reduction in page load time and a 15% boost in user engagement.
- Design and implement RESTful APIs for internal services used by 5+ product teams, ensuring improved modularity and developer efficiency.
- Mentor 3 junior developers through code reviews, pair programming, and monthly knowledge-sharing sessions.
- Work closely with DevOps to containerize legacy services using Docker and deploy them via Kubernetes, significantly improving system reliability.

2018 - 2021

Software Engineer
Expedia Group / Bellevue, WA

- Contributed to the development of backend services for the Flights team using Python and Node.js, processing over 10 million daily search queries.
- Refactored legacy codebases to follow modern architectural standards, reducing tech debt and improving test coverage by 40%.
- Collaborated with UI/UX designers to improve the booking funnel, increasing conversion rates by 8% quarter-over-quarter.
- Built monitoring dashboards using Grafana and Prometheus to track system health and minimize downtime.

ADDITIONAL PROJECTS

Open Source Contributor

Maintainer for "CleanForms," a lightweight React form validation library with over 2,500 GitHub stars.
