

# BIOMEDICAL SCIENTIST

## James Cooper

### COVER LETTER

Dear Dr. Bellamy,

I am writing to apply for the Biomedical Scientist – Oncology Research position at Genentech, as listed on your careers page. With over four years of experience in translational cancer biology and a Master's in Molecular Medicine from Imperial College London, I am confident in my ability to contribute meaningfully to Genentech's pioneering research.

Currently, I work at Cancer Research UK's Manchester Institute, where I focus on immunotherapeutic strategies targeting solid tumors. I led a project optimizing T-cell co-culture assays and implemented CRISPR screening to identify resistance mechanisms to checkpoint inhibitors. My work resulted in a co-authored publication in *\*Nature Cancer\** and reinforced my passion for bridging molecular discoveries with clinical applications.

Genentech's commitment to integrating basic science with patient-centric therapies deeply resonates with me. I am particularly excited about your recent work on antibody-drug conjugates, and I am eager to collaborate within such an innovative environment.

I would be thrilled to discuss how my experience and dedication to oncology research can support your team's ambitious goals. Thank you for your time and consideration.

Warm regards,

James Cooper
