Professional summary

Detail-oriented Incoming Supplier Quality Engineer with experience in quality inspections, supplier audits, and ISO 9001 compliance in the electronics manufacturing sector. Adept at reducing nonconformities through collaborative process improvements and detailed root cause analysis.

Experience

Flextronics International

June 2020 - Now

Charlotte, NC

Incoming Quality Engineer

- Lead the incoming inspection process for over 150 components weekly, using CMM and visual inspection tools, achieving a 30% reduction in part rejection rates year-over-year.
- Develop incoming quality control plans aligned with ISO 9001 standards and collaborate with procurement to resolve noncompliance within 24 hours.
- Create and maintain first article inspection records for 80+ new parts annually, improving documentation accuracy by 45%.
- Coordinate MRB (Material Review Board) decisions with engineering and purchasing to streamline quarantined part processing, reducing hold time by 22%.

Jabil Circuit

August 2017 - May 2020

Hickory, NC

Quality Inspector

- Inspected mechanical and electrical parts from international suppliers, documenting and resolving discrepancies using NCR forms.
- Trained 4 new inspectors in proper calibration of gauges and interpretation of engineering drawings, improving team capability.
- Partnered with the supplier quality team to review supplier scorecards and initiate corrective action requests.
