SOPHIE GRANT

MONITORING IVF NURSE

PROFESSIONAL SUMMARY

Compassionate Monitoring IVF Nurse with a sharp eye for lab trends and cycle progress. Skilled in administering ultrasounds, interpreting hormone panels, and maintaining calm, patient-centered care during high-stress treatment windows.

EXPERIENCE

- January 2021 - Now

Monitoring IVF Nurse

Aspire Fertility / Austin, TX

- Manage daily monitoring for 20–30 patients, performing blood draws, coordinating ultrasounds, and assessing cycle alignment to prescribed protocols.
- Identify anomalies in hormone labs and follicular development, proactively notifying physicians and suggesting possible adjustments to medication regimens.
- Utilize eIVF to log real-time updates on cycle status, ensuring synchronized communication across care teams and lab services.
- Educate patients on timing, expectations, and implications of daily monitoring, helping reduce anxiety and promoting adherence to appointments.

- July 2017 - December 2020

Fertility Staff Nurse

Dallas IVF / Dallas, TX

- Supported pre-dawn lab operations, including preparing samples for hormone analysis and verifying timing-sensitive tests with external labs.
- Conducted intake assessments for IVF and IUI patients, entering complete histories and scheduling ongoing cycle visits without administrative delays.
- Built patient trust by consistently providing accurate explanations about monitoring results and coordinating follow-ups with the physician team.
- Participated in patient recall campaigns to ensure no missed lab results or lapses in care between treatment stages, improving continuity metrics.
