

Professional summary

Self-employed SSIS Consultant with experience delivering tailored ETL solutions across retail, logistics, and nonprofit industries. Known for building reliable data pipelines that consistently meet deadlines and budget goals.

Freelance Project Highlights

Retail Client – Inventory Analytics ETL

- Designed SSIS workflows extracting product-level sales data from 10+ POS systems.
- Consolidated both historical and real-time data feeds to enable daily restock notifications.
- Implemented robust error handling and retry logic to reduce data loss risks.

Nonprofit – Donor Database Migration

- Led migration of SQL Server database from legacy CRM to Salesforce using SSIS and KingswaySoft.
- Standardized and cleansed donor records utilizing Fuzzy Grouping transformations.
- Provided comprehensive documentation and conducted training for internal teams.

Logistics – Real-Time Shipment Tracker

- Developed SSIS packages triggered by API calls and FTP uploads for timely data processing.
- Integrated third-party shipment information into internal dashboards using Power BI.

Experience

ETL Developer

July 2015 - December 2022

BlueWave Logistics / San Diego, CA

- Developed SSIS packages to automate shipment and inventory data flows.
- Collaborated with BI team to create dashboards using Power BI for real-time operational insights.
- Implemented data validation rules and error-handling routines that improved data quality by 15%.

Junior Data Analyst

June 2013 - June 2015

RetailCorp / San Diego, CA

- Assisted in the development of scripts for daily sales reporting using SQL Server tools.
- Supported data cleansing and enrichment tasks to prepare data for analytics teams.
