Mail: daniel.rios.it@outlook.com

Address: Seattle, WA

Cyber Transport Systems Specialist in the U.S. Air Force preparing to transition into civilian IT and cybersecurity. Offers experience maintaining secure communications, troubleshooting networks, and ensuring data integrity. Ready to apply technical expertise to infrastructure and help desk roles in the private sector.

EXPERIENCE

2016 - Now	U.S. Air Force / Joint Base Lewis-McChord, WA
Cyber Transport Specialist	• Deploy and maintain communication infrastructure across secure Air Force networks, configuring routers, switches, and encryption devices for classified and unclassified systems. • Respond to and resolve system outages and user-reported issues through structured troubleshooting and hands-on repair, improving network uptime across multiple facilities by 40%. • Conduct cybersecurity assessments and remediation procedures as part of compliance readiness evaluations, ensuring systems meet NIST and DoD standards for confidentiality and integrity. • Mentor and supervise junior technicians, delivering instruction on access control, network protocols, and threat response to foster continuous learning within the unit.

EDUCATION

Bachelor of Science in Information Technology	Western Governors University Remote Expected 2025
---	---

Certifications	• CompTIA Security+ - 2025 • Cisco Certified Network Associate (CCNA) - 2024 • CompTIA A+ - 2024
----------------	--

Additional Information	Currently serving through end of 2025; TS/SCI clearance active; Open to hybrid and on-site IT roles in Washington state
------------------------	---
