

# ETHAN HARRIS

## Automation QA Tester

### Education

Bachelor of Technology in Information,  
New York Institute of Technology,  
Graduated: December 2016

Certified Selenium Tester, Selenium  
WebDriver Academy, Certification Date:  
March 2019

ISTQB Advanced Test Automation  
Engineer, International Software Testing  
Qualifications Board, Certification Date:  
June 2018

### Skills

Selenium WebDriver, Java, ★★★★★  
TestNG

Continuous Integration ★★★★★  
(Jenkins, GitHub)

CI/CD Pipeline ★★★★★  
Automation

API Testing with Postman ★★★★★

Test automation ★★★★★  
framework design

Performance testing ★★★★★

Agile/Scrum environment ★★★★★

JIRA, TestRail ★★★★★

### Languages

### Professional summary

Experienced Automation QA Tester with 8+ years in creating, executing, and maintaining automated test scripts for web and mobile applications. Strong expertise in Selenium, Java, and CI/CD pipelines. Proven track record of improving testing efficiency and reducing manual testing efforts.

### Experience

July 2020 - May 2025

#### Automation QA Tester

Bank of America, New York, NY

- Developed and maintained automated test scripts for banking applications using Selenium WebDriver and Java.
- Integrated automated tests into the CI/CD pipeline using Jenkins to ensure faster deployment cycles.
- Collaborated with development teams to identify and address issues in the automation framework.
- Regularly updated automated test suites and ensured high coverage across critical application features.

February 2017 - June 2020

#### Automation Tester

Tech Innovators Inc.

- Developed and executed automated test scripts using Selenium, Java, and TestNG for e-commerce applications.
- Worked closely with developers to define test requirements and analyze application code for testing.
- Automated regression tests to improve product release cycles and reduce manual testing efforts by 40%.
- Participated in code reviews, providing input on testability and areas for improvement in the software design.

### Volunteer Experience

March 2019 - Now

#### Software Testing Mentor

Tech for Good

- Mentor junior QA testers in test automation best practices, Selenium, and Java.
- Host monthly workshops for newcomers in the software testing field, providing guidance on career growth and skills development.
