Keith T. Biermann

COVER LETTER

Dear Diana G. Hyatt,

I am writing to express my interest in the Lead Military Analyst position at US Army. With over 10 years of experience in military intelligence and analysis, I am confident that I have the necessary qualifications to excel in this role.

In my previous role as a Military Analyst at the Department of Defense, I was responsible for conducting complex analysis of global military operations and providing strategic recommendations to senior leadership. Through my extensive research and data analysis, I was able to identify potential threats and develop effective countermeasures, resulting in a decrease in security breaches.

One of my biggest achievements was during my deployment in Afghanistan, where I led a team of analysts in providing critical intelligence support to ground troops. Our efforts directly contributed to the successful capture of a high-value target, receiving recognition from both our commanders and the local community.

As a highly skilled analyst, I possess advanced knowledge in areas such as geospatial intelligence, threat assessment, and predictive analysis. I am also proficient in various software and tools used for data collection and analysis, including ArcGIS and Palantir.

Apart from my technical abilities, I believe my best qualities include strong leadership skills, attention to detail, and the ability to thrive in high-pressure environments.

I am excited about the opportunity to bring my expertise to US Army. Thank you for considering my application.

Sincerely,

Keith T. Biermann
